PROFESSIONAL SUMMARY

Studying Computer Engineering with a Diploma in AI applied to Robotics at Universidad Francisco de Vitoria. Proven ability in C, C#, Python, web programming, machine and deep learning, coupled with strong communication and project leadership skills. Successfully collaborated with teams using Docker, branching strategies and software engineering concepts to develop extensive projects as a developer and product owner. Committed to driving innovative solutions in fast-paced environments.

Developed a vast amount of projects on Machine Learning topics, gaining experience on the subject including supervised and unsupervised learning, reinforcement learning, countless different algorithms with tested knowledge on regression, classification, clustering, neural networks, dimensionality reduction and data preprocessing techniques, ...

EDUCATION

Universidad Francisco de Vitoria, Madrid

Bachelor of Computer Engineering (Bilingual) and Diploma in AI applied to Robotics Sep 2023 - May 2027

Software Integration, Data Bases, O.S., Computational Complexity, Linear Algebra, Discrete Mathematics, Data Mining, ...

RELEVANT EXPERIENCE

Cluster Madrid & Alastria Blockchain Ecosystem, Comunidad De Madrid

Sep 2025- Present

VTB - Blockchain & Full-Stack Developer and Product Owner + Hackathon Winner

Presented, designed, developed, and applied a centralized blockchain initiative addressing real-world challenges set by the Blockchain Cluster President in Madrid. Solved complex engineering problems to meet team goals. Collaborated with engineers to define requirements, plan implementation, and estimate timelines. Produced technical documentation for stakeholders and strengthened communication and organizational skills through team collaboration and a SCRUM framework. Received mentoring and guidance from Alastria engineers and a monetary awards for the performance on the project.

Universidad Francisco de Vitoria, Madrid

Sep 2025 - June 2026

Postgraduate Programs and Administration Internship

Supporting the administration and coordination of postgraduate programs, including student communications, data management, and academic event organization. Applying my computer engineering knowledge to optimize departmental processes and collaborating with staff and faculty to enhance the postgraduate student experience.

La Nave, Madrid

Mar 2026

Participant at Hackathon Next Job x CM 5th Edition with Iberdrola

Participated in an innovation hackathon focused on reducing youth unemployment through intergenerational collaboration. Developed REDES, a platform designed to connect young talent with senior professionals within Iberdrola to foster mentoring, knowledge transfer, and access to opportunities in the energy transition.

Centro Abierto Catalejo, Madrid

Sep 2024 - June 2025

Volunteering at Children's Day Center

I spent nine months at Centro Abierto Catalejo, where I helped children facing economic hardship and health challenges with their schoolwork and education. I volunteered weekly, gaining firsthand insight into the obstacles they encounter—not only in academics but also in developing self-learning skills and resilience to overcome difficulties.

AGGREGATE EXPERIENCE

Universidad Francisco de Vitoria, Madrid

Applied Data Mining & Machine Learning Projects

- **Data Architecture & Deep Cleaning:** Processed and engineered multiple flawed datasets, applying advanced cleaning techniques to resolve structural errors, handle missing variables, and prepare data for modeling.
- **Algorithm Implementation:** Designed and trained diverse classification, regression and clustering models across multiple domains, utilizing Random Forests, SVM, Naive Bayes, K-NN, Optimization-Based, DBSCAN, K-Means, ...
- **Model Evaluation & Optimization:** Evaluated algorithm performance using task-specific metrics and cross-validation, successfully identifying and tuning the optimal models for complex regression and classification tasks.

Universidad Francisco de Vitoria, Madrid

Applied Artificial Intelligence & Deep Learning Projects

- **Computer Vision & Deep Learning Architectures:** Engineered end-to-end computer vision pipelines (from custom dataset preparation to evaluation), implementing convolutional blocks, encoder-decoder networks, and Vision Transformers using PyTorch to solve complex image classification tasks.
- **Natural Language Processing (NLP):** Designed and trained text-processing models by implementing Bag of Words, TF-IDF, and advanced Word Embeddings, handling the full data lifecycle to clean, extract features, and evaluate unstructured text data.
- **Unsupervised Learning & Network Optimization:** Developed foundational neural networks and Self-Organizing Maps (SOMs), strictly managing backpropagation mechanics and rigorously tuning hyperparameters to optimize convergence and model accuracy.

The Hague University of Applied Sciences & Universidad Francisco de Vitoria

Sep 2025- Feb 2026

TutorLink - Product Owner

As Product Owner for an international SCRUM initiative with THUAS, I led a cross-cultural engineering team, defining the scope from concept to functional MVP. I managed the full SDLC and sprint reporting in Azure DevOps, translating business requirements into prioritized User Stories and Epics with rigorous acceptance criteria. Through iterative backlog management and sprint synchronization, I aligned distributed efforts to deliver a scalable web solution.

TECHNICAL SKILLS

Programming Languages: Python, C, C#, SQL, JavaScript, HTML/CSS, R.

Machine Learning & AI: PyTorch, TensorFlow, Keras, YOLO architectures, Computer Vision, NLP.

Data Science & Visualization: Pandas, NumPy, Matplotlib, Seaborn.

Cloud, DevOps & Systems: Linux/Ubuntu, Shell Scripting, Git/GitHub, Docker, AWS, Azure, ROS 2, Vercel.

Networking & Tools: MATLAB, Cisco Packet Tracer, Docker.

METHODOLOGIES AND LEADERSHIP

Product & Project Management: Agile/Scrum methodologies, Product Ownership, Project Leadership.

Software Engineering: End-to-End Software Development Lifecycle, Structured Planning, Systems Architecture.

LANGUAGES

- Native in Spanish
- Proficient English (C2)
